PROJECTS

Aptech Vision Project: Future Ride – Frontend Web Development [App](#) [Link](#)
Developed **Future Ride**, a responsive cab booking web application using **HTML, CSS, JavaScript, and Bootstrap**. The website allows users to easily book rides in advance, view available services, and contact the company online. Focused on creating a **modern, user-friendly interface** with smooth navigation, real-time form validation, and optimized performance. Integrated clean UI design principles to enhance user experience and ensure mobile

compatibility.

Self Project Create: Netflix Clone Front-Page – Frontend Web Development

Designed and developed the **front page of a Netflix clone** using **HTML, CSS, and JavaScript** to replicate the look and feel of the original platform. Implemented responsive layouts, interactive hover effects, and background video banners for a real streaming experience. Focused on **UI/UX design, responsiveness, and pixel-perfect styling** to match Netflix’s interface across all devices.

E-Project: Sound Music Audio and Video – Backend Web Development

[App](#) [Link](#)

A full-stack web application built with **PHP, HTML, CSS, JavaScript, and MySQL** that allows users to explore and interact with music content. The project features core pages for **authentication (login/register), music playlists, audio and video playback, user session handling, and admin management dashboards**. It demonstrates backend logic with **PHP and MySQL database integration** for handling user data and content, alongside frontend components to display and play media files, form submissions, and dynamic UI updates. Version control and project history are managed via **Git and GitHub**.
